

FOR IMMEDIATE RELEASE

**VIZpin expands Smartphone Access Control to ASIA with Main Hardware, Inc.**

VIZpin ASIA to provide regional support for the popular Access Control as a Service (ACaaS)

**Lancaster, Pennsylvania – August 22, 2016 — VIZpin**, the market leader in Smartphone Access Control, today announced that it has added sales, technical and logistics support in Singapore, India, Indonesia and the Philippines through a partnership with Main Hardware, Inc.

Alfred Sng, who will head up VIZpin ASIA, commented “there are more than 1.2 billion Smartphone users in Asia, the figure is projected to grow to 2 billion by 2019. There is high demand in the region for affordable, managed access control with audit trails and schedules. Standalone systems are inexpensive but often don’t have audit trails and remote management. Panel based systems are often too expensive and required a local network connection, so VIZpin is a perfect fit for many applications.”

“We have seen a growing demand for our solution in Asia and want to ensure customers receive the same the best-in-class support our other customers are accustomed to” explained Paul Bodell, President and CEO of VIZpin Inc. “We were approached by several companies but none demonstrated the expertise and commitment to service that Main Hardware showed us, they are the perfect fit.”

VIZpin ASIA will keep inventory and provide sales and technical support from its Singapore office and through regional partners.
