

smartphone Access Control System

Your **Phone**
is Your **Key**®

The VIZpin system delivers convenient, affordable and secure access control that is perfect for doors, gates, latches and more. Our Cloud Management Tools, Bluetooth Controllers and Smartphone Apps combine all the features of a sophisticated access system with a long-range Bluetooth reader in a small, easy to install package. It's perfect for new installations or for replacing older access control systems. It even works with your existing card readers, biometrics or keypads.

With VIZpin you can manage access to virtually anything. VIZpin uses your phone as your key and your network, eliminating the hassle and expense of panels, cards, software, IT networks and internet service providers. Our Cloud Management Tools let you send and revoke secure, encrypted keys from anywhere, anytime to anyone with the VIZpin SMART app. Keys can have schedules and VIZpin provides a record of when they were used making it perfect for employees, visitors and contractors.

VIZpin Bluetooth Controllers work up to 30+' (10+M) away so they can be mounted out-of-sight in a secure, protected area making them perfect for architectural or historically sensitive installations as well as keeping your system away from hackers, weather and vandals.
