

Solar Kit Instructions

V 103018

What your kit includes:

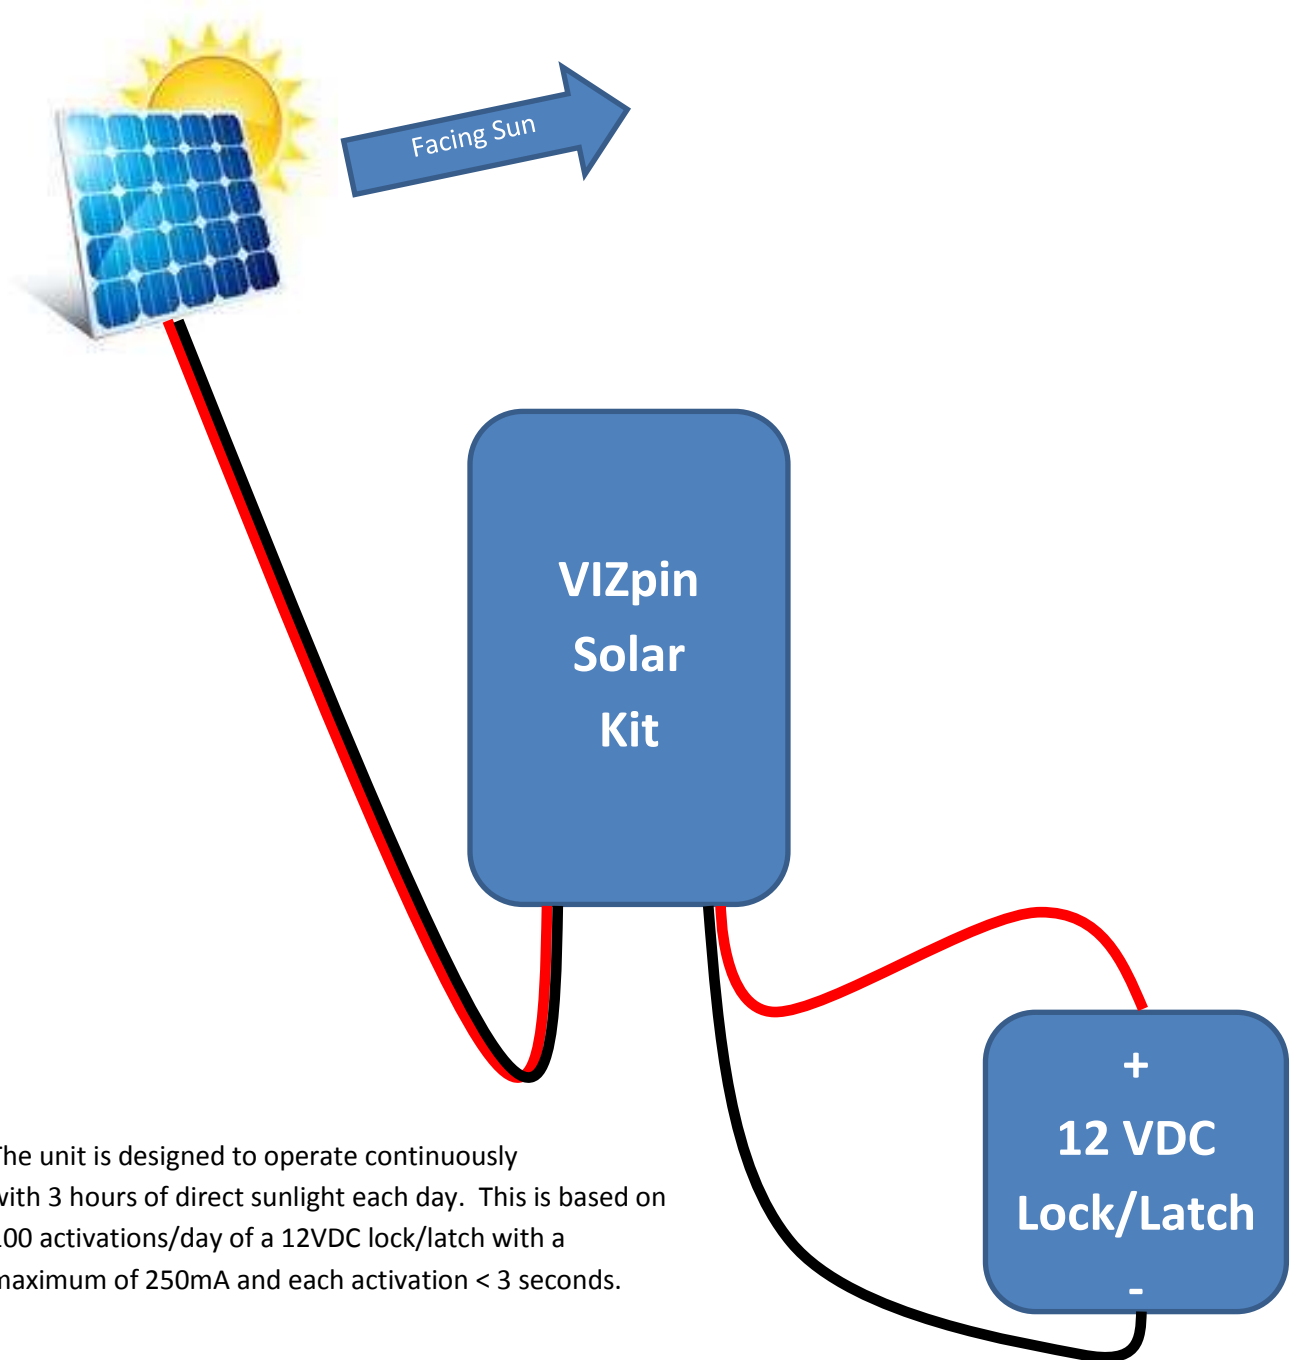

Solar Kit Instructions

V 103018

How to install it:

1. Safely mount the Environmental Enclosure to a sturdy fence or pole. If possible, do not mount it in direct sunlight. Each installation has unique requirements and codes. You may need additional mounting hardware to ensure you comply with local codes.
2. Safely mount the Solar Panel to a sturdy fence or pole. The solar panel should remain clear of shade and facing the sun.

The unit is designed to operate continuously with 3 hours of direct sunlight each day. This is based on 100 activations/day of a 12VDC lock/latch with a maximum of 250mA and each activation < 3 seconds.
