

# Cloud-based Smartphone Access Control

The most convenient, affordable, secure way to control access.

Your **Phone** is Your **Key**®

POWERED BY   
**vizpin**®

lets you provide convenient, secure access to anyone with the VIZpin SMART app at the click of a button. Users simply download the app, register, and you can send them Smartkeys that work 24/7 or on a designated schedule. Managing VIZpin in our easy-to-use portal requires no special training and because it is cloud-based, the latest features are automatically available to you.

## **Convenient**

Grant and revoke access to anyone, anytime, from anywhere without having to worry about cards, FOBs or remembering PIN numbers – your phone does it all, even when networks are unavailable.

## **Secure**

All VIZpin Smartkeys are heavily encrypted and work without connecting to your local network eliminating the possibility of data hacking. Smartkeys are unique to the user's phone and cannot be copied to another device. And unlike keycards and physical keys, people don't share their phones.

## **Affordable**

VIZpin provides all the benefits of a managed access control system and costs about the same as a keypad system. There are no network support or ISP costs, and the cloud-based system ensures you have the latest features and enhancements without hardware upgrades. Plus, VIZpin Smartkeys are just a fraction of the cost of traditional cards or FOBs.

## Advantages

- Unlimited users, doors and activity records
- Simple and convenient user management
- Low-cost installation and credentials
- Low power and long read range of up to approx. 30' (10M)
